AMP NON-DISCLOSURE AGREEMENT

Upon initial login, all users must review and accept the NDA

Non-Disclosure Agreement

I understand that I am identified as a person with access to contractor proposal and source selection information regarding a pending procurement identified as Department of Energy (DOE) SBIR/STTR program. Both the Federal Acquisition Regulation (FAR), (3.104-4 and 15.207) and federal law (41 U.S.C. §§ 2101-2107) impose safeguards on the handling of this material and restrictions on the release or disclosure of this information.

I certify that I will not discuss with, or reveal to, any representative of any business organization or other entity, or any individual person (except the contracting officer, or a person specifically assigned to any specific proposal evaluation group, or legal counsel assigned) either within or without the United States Government, any aspects of the pending procurement. The term "any aspects of the pending procurement" includes, but is not limited to, information such as the identity and number of offerors, the method of procurement, the number and identity of Government personnel involved, and the schedule of key technical and procurement events in the source selection process. Except as specifically authorized by Contracting Officer/Agreements Officer, the release of such information constitutes the unauthorized release of advance procurement or procurement information.

I recognize that a significant factor in the successful and proper completion of the source selection process is the strict confidentiality observed by all Government participants in the various proposal evaluation review, or advisory staff meetings concerning all of the activities and procedures involved in source selection. I recognize that failure to comply with these requirements may compromise the ultimate source selection and may violate law and regulation. I acknowledge that the unauthorized release of advance acquisition/procurement or acquisition/procurement source selection information as defined herein may result in the termination of my participation in this procurement and may subject me to adverse legal, administrative, and employment actions.

In the event I release any of the advance acquisition/procurement or source selection information covered hereby, I agree to advise the senior member of the proposal evaluation group to which I am assigned as soon as practicable. I will identify the business organization or other entity, or individual person, to whom the information in question was divulged and the content of that information.
